To whom it may concern

To whom it may concern

GMMC GmbH herewith confirms that the available USB host communication interface types USB-CCID, USB-CDC VCOM and USB-HID KBD have no influence on the RF parameters of the GMMC Pocket NFC Multi- Protocol reader/writer. The RF behavior is given by the analog RF matching circuitry and components and is not linked to the digital host communication interface.

Graz, 12 December 2019

Michael Ganzera
Managing Director GMMC GmbH
